

ORACLE USER INTERFACES (CLOUD AND ON-PREMISE SERVICES)

Solution IT helps Clients with end-to-end Oracle Web Application frameworks built using Java EE standards, MVC architecture, JavaScript, Alta-UI, REST and open-source technologies to simplify and accelerate implementing enterprise applications.

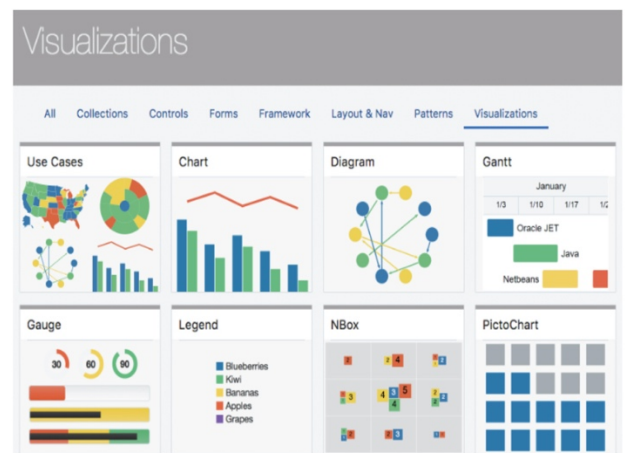

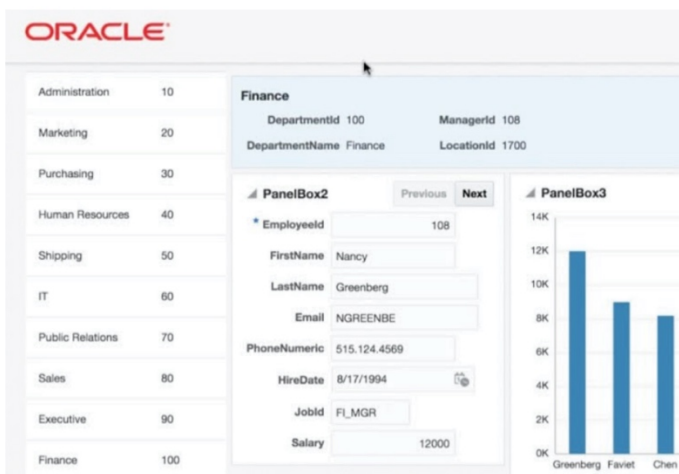

Services provided (Cloud and On-Premise):

ADF (Application Development Framework): Creating Rich UIs for web, mobile, and desktop clients, using MVC architecture, data-binding, reusable business logic and validation, declarative security, etc.

JET (JavaScript Extension Toolkit): Implementing flexible client-side framework that can integrate with a variety of back-end services like REST, creating JavaScript UIs integrated with open-source libraries like jQuery, KnockoutJS, etc.

Services provided (On-Premise):

OAF (Oracle Application Framework): Building custom HTML based Web applications and creating Extensions, Personalizations, and Customizations in Oracle E-Business Suite, leveraging J2EE and MVC framework

BUILD THE PERFECT TEAM
